On the naked ques ion whether they would have appropriations or not, few districts would be inclined to you dihas been neglicial. A recent Wish rigion dis mutch indicated the in ide did not displease the people of sid districts among which the sums were chiefly dis. This can be a nuisaler, and its use should be tributed. Take our own state. George got abolished inition of increased. It was orig

rectly in the negative. The truth is the extravagance of congress in visting the public more for Oregon than any other represents in the first of the ore that, and he was re-slocted by the largest majority ever given a representative to the first of them. congress from this state, just because his dilicongress from sale was a like the control was district the first that the now com would be tinely approved. The people of the castors good mean between the 10-cent piece, the part of the shute were pleased with the large | bit and the quanter. On this coast everyfor improvoment of the upper Culumbia 12 % costs the cld skilling. The mutations apprepriations for the locks at the Cascades and Snake rivers; the people of the contains of correctly really know the shilling out of toward the head of the Willamottevalley wants existence, and is its send the dime, or short ed to return their acknowledgments for the bit," came into general use. We do no appropriation lor Vaquina Bay, and so on. like either the "short" bit or the "long" bit: appropriation [cf. Yaquina Bay, and so on. But how was it it it Page of California, chairman of the committee on commerce, was beat change should be raised—withing now perfectly on it has district, though no man ever got easy this with on currency, and one which such some for its as he did, and though his many would appearing be put into practice if exjorities heretologic had atware that the beauty is worth but a state of the 20-cont place, a coin state of the 20-cont place, a coin was detected be time of his action on the river of that deposition in was never really needed and herbor bill. The facts show that this was and herbor bill. The facts show that this was and herbor bill. Page had been elected at d related the control of the control elected for manyforms. He is a rather coarse politician of the "stallwart" kind. For rears the material fore-croft had been accumulating against him. He had a chosen band of "work; and had been accustomed to push every who had been accustomed to push every pieces! out of the most every other man's friends out of the most brodent of naout of the most brodent of nations. Nowten every in this sand India is
fine year of result against the bosses and ma
shines he went town. His friends complain in France. Nowthere is the effect of interest other men and every other man's friends that his constituents, for whom he obtained on money mare fully understood. France has big appropriations, are "qugrateful." Un been a nation for more than a thousand years, doubtedly theyere. But the fact is they were the cums expended in that time on public glad to get the appropriations and will expect works are abused to good calculation, and yet and require the man who has beaten Page to de this year, at the news informed us recently.

continually o strange effects, after the moor

terference w.t. their own imperial will, hough

adving the grants of Venus are now engag-ing a great deal of attention. Out of curiosity one of people will endeavor to obtain a disk of the ann. But scientific observation

est care. The labor of reducing the observa-tions of a thems of Venus with all the pretions of a magnited by modern astronomy is one involving an immense mass of calculations, in the control of the final repetiting assertal years. Balone the final relations of the property of everal governments which take part in the several governments which take part in the work whal the reduced and published. Even then also legen accuracy will not be possible. After the ion wanth feet that the yest for The main use to which these observations are called justice of the cent of appeals, was 123,000. put is that of ascertaining the solar parallax; about of one rate for Folger, the candidate for govto other names, obtaining da a for determining the distance of the sun from us, in which there is an pet an uncertainty of perhaps a

season of the year we cannot count with per-iminity on a inters sky, and therefore no one Sirtuil here may is able to witness the transit. But the region is its visibility will include the whole weight hemisphere. Amsteur observ-ers within fin United States may know who n to look for the appearance of Venus on the sun's limb by noting that the dirst impression of the planet will occur over the whole United States near the same incoment of schoolate time-natury, about the minutes before in its o'clock out the morning of December 6th. Washington mean time. Cwing to cruss of the tables astronomous camest predict within one or too minutes the time of beginning. The ending will occur from turce o'clock to two

quarter of | million miles.

or three with uter past three Washington mean The passioneum recurs in regular cic es four thangevery 343 years. The cycle is made up of four mervals, the lengths of which are, in regular order, 105 y years, 8 years, 12 12 years and 8 years, after which the intervalrepeat then selver. The last transit took place eight years ago, and the next one will occur on

the 8th differer 2001. But the results afforded by condevations of the transfer of Venus are nothing more than contribute as to the problem of describining the sau spirature. They are highly useful for amplification with and confiction of results obtimed log ther methods, as by calculations of the select yes light and of the gravilating force of the same upon the most of Approximation of the force of the only result that earlies be tes bed El orhaps abs du e certainty maybe ver the attitude of the many regent works the distance of the sun from placed between the limits 92.5-00.00 and 95-000,000 of in many regent works the distance of the sun from placed between the limits 92.5-00.00 and 95-000,000 of in many regent works the distance of the sun from the placed between the limits 92.5-00.00 and 95-000,000 of in many regent works the distance of the sun from the placed between the limits 92.5-00.00 and 95-000,000 of in many regent works the distance
